Highlights

Changes made since August 30, 2004 revision are denoted by a single vertical bar in the right margin (|). Deletions are denoted by two hyphens followed by a single vertical bar (--|).

1. A new Line 8 has been added to Form 4868 for those taxpayers that are "out of the country" and a U.S. citizen or resident.
2. Deleted Memphis Submission Processing Campus (MSPC). Memphis is no longer an Electronic Processing Site.
3. Added Fresno Submission Processing Campus as an Electronic Processing Site.
4. Reference to TeleFile Form 4868 has been deleted.
5. Deleted reference to District Office Codes and/or Universal Location Codes. The codes are now referred to as the Two Digits Electronic Filing Identification Number (EFIN) Prefix Codes.
6. Other minor changes has been made throughout such as the Tax Year of the Declaration Control Number (DCN) and clarification to what is need when you have a payment.
7. For those individual who are not enrolled in the Electronic Federal Tax Payment System (EFTPS) for Processing Year 2006, payments can be submitted through Lockbox. The Forms 4868 and 2350 can be transmitted electronically. The check can be sent to the Lockbox Sites (listed on the back of the Forms 4868 and 2350) without the Forms 4868 and 2350 attached. The information must be included on the check.
 1. Name (taxpayer)
 2. Social Security Number (taxpayer SSN)
 3. Tax Period
 4. Forms 4868 and 2350
8. Beginning Tax Year 2005, Form 8878 includes the Electronic Funds Withdrawal (EFW) consent language in Part 2 of the form. Many software products are designed to include Form 8878 (e.g. as required for Practitioner PIN method returns or documents). If Form 8878 is not used for an EFW document you must still provide EFW consent language to the taxpayer as shown Section 6.04, Electronic Funds Withdrawal Selections.

Note: If you are filing Forms 4868 and 2350 electronically and there is a balance due, please remember that the PAYMENT MUST BE POST MARKED NO LATER THAN 4/17/06.

ELECTRONIC TRANSMITTED DOCUMENTS -- INTRODUCTION

The Electronic Transmitted Documents System (ETD) has been created to process electronically filed documents that are not attached to a 1040 tax return and are filed separately from the tax return (i.e, stand-alone documents). To the extent possible, the ETD system functions the same as the Electronic Filing system (ELF). For example, the same data communications subsystem is used to receive transmissions and to send acknowledgments.

Documents accepted by the ETD system:

- Form 56
- Form 2350
- Form 2688
- Form 4868
- Form 9465
- Form Payment

Other differences:

- o The record layouts for the TRANA, Forms 56, 2688, 2350, 4868, 9465, RECAP, and Acknowledgment records have been modified: See Part 3, Sections 2 and 7 for more information.
- o To the extent possible, the transmission and error reject codes have been transferred to the ETD system. However, some differences do exist, especially in the codes for the specific tax documents. See Part 3, Sections 3, 4, 5 and ATTACHMENT 1 for more information.

SECTION 1 - GENERAL INFORMATION

.01 Data Communications Subsystem

The ETD system uses the same Data Communications Subsystem as the ELF System. For information about the DCS, refer to Part 1, Section 1.

.02 File Format - General Description

All transmission data must be in ASCII format. No binary fields may be transmitted. More information on file format can be found in Part 1, Section 2.

.03 File Format - Fixed and Variable Length Option

There are two options for transmitting logical tax document records (excluding "TRANA", "TRANB", "SUM" and "RECAP" records): fixed and variable. See Part 1, Section 2 for more information.

.04 Types of Records

There are five types of record associated with the ETD system; the two Transmitter records, the Document record, the Summary record and the Recap record. Each file must contain all five.

Transmitter Records

The first two records on each file must be the Transmitter records (TRANA and TRANB), which will contain data entered by the Transmitter (the firm transmitting directly to the IRS). The format of the TRANA and TRANB records for the ETD system are found in the Section 7 of Part 3.

Document Record

The next record will be the document record. If a tax document consists of more than one page, then each page of a document will have a new document record with the page number incremented. Currently, no form accepted by ETD has more than one page.

Attached Form Payment

One Form Payment Record and one Authentication record can be filed with Forms 4868 and 2350.

Summary Record

The final record for each tax document is the SUMMARY record. This record will contain electronic filer identification data. See Page 87 Part 3 for more information.

SECTION 1 - GENERAL INFORMATION

.04 Types of Records (continued)

RECAP Record

The final record in each transmitted file is the RECAP record. See Section 7 of Part 3 for more information.

.05 Types of Characters

The same chart of characters that are allowed for ELF will be allowed by ETD. Refer to Part 1, Section 5 for more information.

SECTION 2 - ACKNOWLEDGMENT FORMAT

Every transmission will be acknowledged by the return of an acknowledgment file to the transmitter. The acknowledgment file for the ETD system will be comprised of: the original transmitter records (TRANA and TRANB), an ACK Record Set for each recognizable tax document received and the Recap Acknowledgment Record. The last record includes counts for accepted and rejected documents.

If the entire transmission is rejected, the acknowledgment file will contain one ACK Key record with a "T" in the acceptance code field and separate ACK Error records containing each transmission reject error code associated with the transmission.

The acknowledgment of an individual document will be an ACK Record Set. This set will always have one ACK Key record and up to 96 ACK Error records associated with it. The ACK Key record will contain all of the identifying information for the document it represents, plus a field to indicate how many, if any, ACK Error records follow. Each ACK Error record will contain data defining the document, page, occurrence and the field sequence number in error and the error code defining the specific error encountered.

If an ACK Key record contains an "R" in the acceptance code field, the document has been rejected due to a fatal error involving the format, internal consistency or data errors in a key field. It must be corrected and resubmitted to the IRS to be considered as a filed document.

If an ACK KEY record contains a "D" in the acceptance code field, the document has been identified as a duplicate, i.e., a document has been previously transmitted and accepted for that Social Security Number. This acceptance code will be used for duplicate forms 2350 and 4868 only.

If an ACK Key record contains an "A" in the acceptance code field, the document has been accepted as a filed tax document and will be processed in the same manner as a document originally submitted on paper. This does not imply that the document will pass all IRS Service Center validity checks or post to the IRS Master File without delays.

If an ACK Key record contains the words "Ext Approved" in the Form 2688 Extension field (SEQ 0040), the extension request has been approved. **Caution: If we later find that statements made on the extension application are false or misleading, the extension is null and void. Taxpayer will owe a late filing penalty.**

The reject codes and references to validation criteria that cause the codes to be assigned are listed in Part 3, Attachment 1. **There are differences between the reject codes in the ETD system and the codes in the ELF system.**

Minor differences in record layouts exist (see the acknowledgment records on the following page and the TRANA record layout in Part 3, Section 7).

.01 IRS e-file Signature Authorization on Application for Extension of Time To File (Form 8878)

1. Form 8878, IRS e-file Signature Authorization on Application for Extension of Time To File, can be used to authorize an Electronic Return Originator to enter the taxpayer's self-select personal identification number (PIN) as the taxpayer's signature on electronically filed Forms 4868, 2688, and 2350. Form 8878 is provided as a convenience when the taxpayer is unavailable or unable to return to the office, or it is inconvenient for the taxpayer to personally sign the electronically prepared income tax return or document.
2. The practitioner will provide Form 8878 to the taxpayer along with a copy of the completed extension application personally or by U.S. mail, private delivery service, e-mail, or an Internet web site. Upon review of their extension application, the taxpayer(s) complete Part 2 of Form 8878 with their PIN, signature and date. The taxpayer must return the form to the ERO either personally, by U.S. mail, private delivery service, or FAX transmission. The ERO must retain the completed Form 8878 as instructed on the form.
3. Electronic Funds Withdrawals accompanying Form 4868 can be signed using the Practitioner PIN method. Jurat/Disclosure Version I should be used for this purpose. The taxpayer is required to complete a Form 8878 and check the appropriate box in Part 2 of Form 8878 to indicate if they will enter their own PIN or authorize the ERO to do so on their behalf. Part 3 of Form 8878 must always be completed by the ERO. Note that a signature is only required to authorize the withdrawal. There is no signature requirement for the Form 4868 itself.

Tax Year 2005 Form 8878 and instructions will be available on the IRS web site, The Digital Daily, at www.irs.gov (click on "Forms and Pubs", then "Forms and Instructions"). The tax year 2005 form will be posted on the web site as soon as possible; however, it may not be available at the time this document is published.

4. An Exhibit of Form 8878 will be included in Publication 1345A, Filing Season Supplement for Authorized e-file Providers, Tax Year 2005.

Section 6 - Self-Select PIN for ETD Specifications

.02 Jurat/Disclosure Guidelines

1. Beginning Tax Year 2005, Form 8878 includes the Electronic Funds Withdrawal (EFW) consent language in Part 2 of the form. Many software products are designed to include Form 8878 (e.g. as required for Practitioner PIN method returns or documents). If Form 8878 is not used for an EFW document you must still provide EFW consent language to the taxpayer as shown Section 6.04, Electronic Funds Withdrawal Selections. When Form 8878 is used, the Electronic Funds Withdrawal statement is provided to the taxpayer in Part 2 of the form. A separate EFW statement does not have to be provided to the taxpayer. The jurats E, F, and G, displayed in this document still include a copy of the EFW statements, but they are not included when Form 8878 is used.
2. This section provides guidelines for the jurat/disclosure language that is to be included in software packages for stand-alone documents processed through the Electronic Transmitted Document (ETD) System.
3. In all instances, the appropriate jurat/disclosure text must be provided to taxpayers prior to the presentation of fields used to enter signature(s) (e.g. PIN) and related authentication information (e.g. Date of Birth and Adjusted Gross Income).
4. It is imperative that all taxpayers who use the Electronic Funds Withdrawal (EFW) feature are provided with the appropriate Electronic Funds Withdrawal statement for their review. Only the approved EFW text displayed in this publication is to be used. The approved EFW text (selection D2 or D3 for ETD documents) is displayed on the jurat exhibits, but is not required when EFW does not apply.
5. On-line software products shall provide the capability for taxpayers to view the jurat/disclosure statements on the input screen.
6. For authentication purposes, some jurat versions include entry fields for taxpayer and spouse adjusted gross income (AGI) amount from the prior year return. To minimize errors, it is suggested that software packages inform users that the AGI amount for each taxpayer must be the total AGI figure from the taxpayer's originally filed prior year income tax return and not an amount from an amended return or a math error correction. In most cases, both taxpayers filing a joint return will enter the same AGI amount.
7. If a taxpayer filed jointly with a different spouse in the previous year, they are to use the total AGI amount from the return filed with the ex-spouse. In this case the AGI amounts for each taxpayer may differ.
8. If a tax year 2005 tax return was not received and processed at IRS by December 18, 2005, enter "0" (zero) as the prior year AGI amount. In the event the return is rejected due to a mismatch of AGI, the return can be resubmitted using the actual AGI amount.

Section 6 - Self-Select PIN for ETD Specifications

.02 Jurat/Disclosure Guidelines

9. Software products intended for use by tax professionals may also provide the functionality to print a graphic equivalent of the jurat/disclosure statements for taxpayers to sign as an alternative to a screen display. A graphic equivalent may be appropriate when the taxpayer will not be present to review the completed return or document in the presence of the ERO, and has elected to authorize the ERO to enter the taxpayer(s) Self Select PIN(s).
10. The jurat/disclosure text selections and samples of the jurat/disclosure text for Codes E - I are included in Part 3 of this document. Use the guidelines below, and notes included with each text selection to determine appropriate jurat entry field format.

Jurat Entry Field Format Guidelines			
Field	Length	Characters	Format/Notes
Dates - (e.g. signature dates, Date of Birth)	Eight	All numeric	MMDDYYYY (must convert to YYYYMMDD for record layouts)
Taxpayer's PIN	Five	All numeric	Cannot be all zeroes
ERO or Paid Preparer PIN	Eleven	All numeric	First six positions = Electronic Filing Identification Number (EFIN); last five positions = self selected numerics
Money Fields	Twelve maximum	All numeric	Dollars ONLY, zero fill if no prior year AGI

11. The following table includes the valid Jurat Disclosure Codes for electronically filed Tax Year 2005 documents processed through the Electronic Transmitted Documents (ETD) System. The codes (e.g. C2,D2,T1) In the "Required Text" column identify the possible selections for each jurat/disclosure version.

Attachment Sequence Number

Because the tax documents processed through the Electronic Transmitted Documents system are stand-alone documents, the Attachment Sequence Number is something of a misnomer. The term is used because this number is used by ETD in the same way as the Attachment Sequence Number is used by the ELF system, on the acknowledgment error records to identify the form in error.

If the tax document has an Attachment Sequence Number printed on the form, that number will be used. If the ELF system accepts the form as part of the tax return, that number will be used. Otherwise, ETD will assign the number.
